To Whom It May Concern:

As Founding Director of the PBL Lab in the Civil and Environmental Engineering Department at Stanford University, I have been pleased to have Mr. Tooryani as one of the actively involved industry mentors for the past 15 years in the AEC Global Teamwork course CEE222 that I have launched in 1993 with university and industry partners worldwide. He has been an invaluable knowledge resources coaching and advising the construction management students in this global learning network. We are very grateful for his time, attention, dedication and commitment to our program and the students he serves.

Henry's mentoring approach has proven very insightful for our students providing real-world data and feedback. He consistently receives praise from students for his ability engage students and draw real-world examples from his professional experience to reinforce the theory and project-based learning experience in this course. Over the years many alumni of our global learning network indicated they valued his very engaging participation. Many of our past students have communicated that they keep in regular contact with Henry after having had the opportunity to interact with him in this global learning experience.

I hold Mr. Mr. Tooryani in very high regard and therefore can recommend him with my highest confidence. Please feel free to contact me if you would like any additional information.

Sincerely,

---

Dr. Renate Fruchter  
Director, Project Based Learning Laboratory
